ASSEMBLY INSTRUCTIONS

IMPORTANT: WE ADVISE YOU TO ASSEMBLE THE TENT ONCE BEFORE GOING CAMPING TO BECOME FAMILIAR WITH THE ASSEMBLY OF THE TENT.

NOTE: To prolong the life of the tent floor, select a level, clean area for the campsite. To prevent damage to the zipper, unzip the door to allow air to enter the tent. To improve the weather resistance of your tent, it is advisable to use seam sealer to coat all exposed seams. You should apply only to the underside of the fly and inside seams of the tent. If applied to the outside seams, discoloration of your tent may occur. Seam sealer is available in the camping section of any local sporting goods store.

IMPORTANT: WE ADVISE YOU TO ASSEMBLE THE TENT ONCE BEFORE GOING CAMPING TO BECOME FAMILIAR WITH THE ASSEMBLY OF THE TENT.

STEP 1: Set up your 10’ x 10’ canopy following the directions that came with the canopy. Make sure it is staked to the ground.

STEP 2: Lower the height of the canopy to the lowest setting to connect the tent to the frame.

STEP 3: Spread the tent out flat under the canopy, floor side down and unzip the door.

STEP 4: Starting at the center peak and working toward the 4 corners, connect the clips on the roof of the tent.

STEP 5: Locate the four brass hooks on the elastic cords that are located at the upper eave corners of the tent. These connect to the eyelets in the four corners of the canopy.

STEP 6: After connecting the brass hooks, connect the clips along the two sides adjacent to the corner. Connect the brass hooks at the two corners. Please see tent top view.

STEP 7: Connect the clips on the two remaining sides of the tent to the canopy as well as the final corner brass hook.

STEP 8: Once the tent is attached to the canopy frame, raise the canopy to its full height.

STEP 9: There are brass hooks located at the bottom corners of the tent. These should be connected to the holes in the bottom of the canopy legs.

STEP 10: Tie the fabric ties located on the tent around the canopy legs to secure the tent to the canopy frame.

STEP 11: Stake the five intermediate points along the four walls of the tent. Hammer the stakes into the ground at a 45° angle using a hammer or mallet, making sure to pull tent floor out even and snug.

Tent should appear as shown.

WARNING: Elastic cords can snap back and hit your eye. To reduce the risk of injury to you and others:

- Keep your body and face clear.
- Do not over-stretch elastic cords.
- Maintain firm grip on hook.
- Pull the hook toward you; if it slips it will spring away from you.
- Make sure hook is fully clipped to canopy before releasing.
- Wear protective eye wear during tent assembly.

Your failure to follow this warning could cause serious injury or permanent disability.

NOTE: To take down tent, follow steps above in the reverse order. Be sure to leave door and windows unzipped. Make sure tent is clean and dry before storing. Place stakes into stake bag which is provided. The tent should be folded into equal parts toward the center of the tent to distribute the bulk. Start a small tight roll, the width of the carry bag. Roll the tent towards the door to allow air to escape. Once rolled, tie a string or rope around tent to hold into place. Place the rolled up tent into carry bag.
